International Conference on Earthquake Engineering

Commemorating the 50th Anniversary of the Great Tangshan Earthquake

July 27-30, 2026 Tangshan, China

Second Announcement

Background

The 1976 Tangshan Earthquake was a landmark seismic event in the history of global disaster mitigation. This conference is convened to mark its 50th anniversary, with the theme "**Commemoration and Advancement: Towards Urban Resilience and Intelligent Disaster Mitigation**". After five decades, Tangshan has become a globally recognized paradigm for post-earthquake recovery and resilience.

This international conference carries the weight of history through "Commemoration"—honoring the victims and inheriting the valuable experience of post-earthquake reconstruction and disaster governance. It gathers momentum for progress through "Advancement", focusing on the core directions of urban resilience and intelligent disaster mitigation, and bringing together global experts, scholars, and policymakers from multidisciplinary fields including earthquake engineering, geotechnical engineering, structural engineering, emergency management, and artificial intelligence. The conference will build a high-end platform for interdisciplinary academic exchanges and achievement transformation, deepen the mutual learning of relevant disciplinary research, and provide theoretical support and technical references for practical applications.

By reviewing the fifty-year development history of related disciplines and mapping out future innovation directions, this conference will further promote interdisciplinary integration, strengthen international cooperation and practical exploration, and contribute collective wisdom to building safer and more resilient cities worldwide.

Main Topics

- Lessons from Tangshan and Historical Major Earthquakes
- Engineering Seismology
- Geotechnical Earthquake Engineering
- Earthquake-Resistant Structural Engineering
- Lifeline Systems and Critical Infrastructure Resilience
- Urban Seismic Safety and Resilience
- Artificial Intelligence in Earthquake Engineering
- Advanced Experimental Technologies for Earthquake Engineering

Registration Fee

Regular Participant: CNY 2,800 or USD 400

Student: CNY 2,500 or USD 350

Important Dates

Long Abstract submission opens: April 10, 2026

Deadline for abstract submission: June 15, 2026

Notification of abstract acceptance: July 15, 2026

Tentative Conference Program

July 27, 2026: Registration

July 28, 2026: Opening Ceremony + Keynote Plenary

July 29, 2026: Parallel Sessions

July 30, 2026: Keynote Plenary + Closing Ceremony

Long Abstract Submission Guidelines

Authors are invited to submit original, unpublished long abstracts of 2-4 pages in English, formatted as a PDF using the official conference template. Submissions should be uploaded through the online submission system before June 15, 2026. Accepted abstracts will be included in the conference proceedings, which will be provided to all participants.

Venue Information
